

# Foreign Trade Association Presents:

Foreign Supplier Verification Programs; and new developments in FDA import operations

Tuesday December 1, 2015. 8:30am - 11:30 am

## Foreign Supplier Verification Programs

Tuesday, December 1, 2015

Section 384a of the Food, Drug & Cosmetic Act requires FDA to implement a Foreign Supplier Verification Program ("FSVP"). FSVP requires importers to perform foreign supplier verification activities to ensure that food imported by the importer or its agent is produced in compliance with specified processes and procedures, and is not adulterated or misbranded. FDA's final regulations implementing the FSVP will be issued this fall. This seminar will assist importers, foreign suppliers and customs brokers to understand the scope of the program, their respective responsibilities, requirements for importation, and consequences of non-compliance.

In addition, you will receive new information about the local FDA Los Angeles Office contact numbers, information on new hired Compliance Officers and recent activities the district office has been involved with.
